What factors influenced your decision to become a physician and your choice of specialty?

My paternal grandfather provided healthcare to the regional population. He did not have any formal training.

Did you experience a defining moment that made you feel you had become a physician?

While being very young in the profession, I was able to save somebody's life with limited medical resources.

As you were training to be a physician, what one piece of advice was most valuable to you?

Be humble!! Be thorough.

What is the most significant medical innovation you experienced in your years of practice?

The electronic technology available.
