

## Samantha L. Rosman, MD

Member, Board of Trustees  
American Medical Association

Samantha L. Rosman, MD, a fellow in pediatric emergency medicine at Boston Medical Center, was elected to the American Medical Association (AMA) Board of Trustees in June 2005. She recently completed her residency in pediatrics at Children's Hospital Boston. She is an active member of the American Academy of Pediatrics (AAP), the American College of Emergency Physicians and the Massachusetts Medical Society.

Dr. Rosman has been a relentless advocate for health care access for all. While a medical student, Dr. Rosman conceived of and helped build a free primary care center for indigent patients in the city of New York. Today that clinic grows stronger and continues to serve an ever-larger number of uninsured patients. Building on her work, she then led efforts to expand health coverage to uninsured children.

While in New York, Dr. Rosman gained more experience in organized medicine by leading the AMA chapter at the Columbia University College of Physicians and Surgeons, and by serving in the Medical Society of the State of New York House of Delegates.

Ever with a mind for expanding coverage on a national level, Dr. Rosman serves as chair of the AMA Task Force on Health System Reform. She has served in the AMA House of Delegates as an alternate delegate for the AAP and also for the AMA Medical Student Section (MSS). She served on the AMA-MSS Governing Council and chaired the AMA-MSS Subcommittee on Increasing Access to Health Care.

Dr. Rosman received her bachelor's degree magna cum laude from Bryn Mawr College in Pennsylvania. She attended medical school at Columbia University College of Physicians and Surgeons and received her medical degree in 2004 with many honors, including AΩA, the Gold Humanism in Medicine Award, and an award of distinction in pediatrics. Prior to entering medical school, she served as a paramedic and an emergency medical technician in Pennsylvania.

Dr. Rosman and her husband, David A. Rosman, MD, live in Boston, where she is a fellow in pediatric emergency medicine and he is a resident in radiology. They hope to continue clinical practice, raise a family, and continue improving our health care system so that one day all have access to quality medical care.

2008–2009
